"Cargo of kinesin identified
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Verhey K.J., Meyer D.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 MEDLINE=21135887; PubMed=11238452;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                TISSUE=Brain;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              INTERACTION
                                                                                                                                                                                                                   and kidney. All isotorms have been and lung. Mapk8ip3A is also expressed in the spleen and lung. INDUCTION. Expressed in neurities 5 days following initiation of nerve growth factor Ngf induced differentiation. Ngf withdrawal nerve growth.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                           pathway namely Mapk8, Mapk9 and Mapk10 to the N-terminal region Map2k4 and Map2k7 to the central region and Map3k11 to the C-terminal region. Binds the TPR motif-containing C-terminal of kinesin light chain, pre-assembled Mapk8ip1 scaffolding comple are then transported as a cargo of kinesin, to the required subcellular location. Subcellular location. Subcellular location cytoplasmic; localised in the soma and growth cones of differentiated neurites and the Golgi and vesion fithe early secretory compartment of epithelial cells. Alternative splicing; Named isoforms=6;
                                                                                                                                                                                                  mediated cleavage.
SIMILARITY: BELONGS
                                                                                                                                                                                                                                                                            TISSUE SPECIFICITY: Highly expressed throughout many regions the brain and at lower levels in the heart, liver, lung, test and kidney. All isoforms have been identified in the brain,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          region of Mapk8ip3 interacts with the C-terminal of Mapk8ip2 not Mapk8ip1. Binds specific components of the JNK signaling
                                                                                                                                                                                                                                                                                                                                    Name=1e
